### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 19-34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected to species 3, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/30/06.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (U.S. Patent No. 5,578,058).

Chen teaches a pacifier comprising a shield with a first (12) and second side (1) with a nipple (2) extending from first side and a nipple cover (31) permanently movably mounted to said shield and pivoting between an open position (Fig. 3) and a closed position (Fig. 2) covering the nipple. Said cover is pivotally mounted at central points on said shield located in a central area of said shield (Fig. 1), where in said cover pivots through slots (13) in said shield.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3734

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhoads (U.S. Patent No. 6,436,125), further in view of Chen (U.S. Patent No. 5,578,058).

Rhodes teaches a double sided baby pacifier (Fig. 1) with a shield (38) having two nipples (22 and 20) extending from different sides of the shield, Rhodes does not have a cover for a nipple, however Chen teaches a pacifier with a cover (Chen, 31) movable between a covering a nipple (first or second nipple) (Chen, Fig. 2) and leaving the other side uncovered, said cover is pivotally mounted at central points on said shield located in a central area of said shield (Chen, Fig. 1), where in said cover pivots through slots (Chen, 13) in said shield.

### ***Allowable Subject Matter***

Claims 7-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

(U.S. Patent No. 3,601,129) Seidl teaches a double sided pacifier.

Art Unit: 3734

(U.S. Patent No. 5,211,656) Maddocks et al. teaches a double sided pacifier.
